Closing Apps – iPhone

1. Put your finger at the absolute bottom middle of the screen. Hold for 0.5+ seconds.

2. Swipe up towards the middle of the screen.

3. The currently open apps should now be showing. This is the app switcher.

4. Swipe desired app upwards to close it. Repeat with any other desired apps.

Commented [AA1]: Maybe add a step indicating they can repeat step 4 until all desired apps are closed.

5. Tap on app to enter it or outside of the apps to cancel the app switcher.
